

The industry's first embeddable player

ReadyTalk Media Player opens a world of possibilities for organizations seeking to share their conferencing content on blogs and web sites while satisfying your audience's demand for a more sophisticated playback experience.

FEATURES

Shareable on any Website or Social Media Platform

HOW READYTALK CAN HELP YOU

Take your content further. Capture more leads, more registrants, more of anything you want with a powerful distribution tool that lets more people view your recordings. Easily share your conference recordings on the site of your choice - WordPress, MoveableType, LiveJournal, YouTube and more.

Industry First Embeddable Player

Embed recordings in corporate blogs, web sites and anywhere your customers are. ReadyTalk Media Player allows your conference recordings to be embedded directly into your web site, just like YouTube. Now your audience remain on your site while viewing your content.

Scales to Fit Your Window

No more annoying clipping and scroll bars. The new Media Player automatically scales to fit your window.

Preview By Thumbnail

Jump to the part that interests you immediately by browsing thumbnails on the fly. No more blind fast forwarding and rewinding to find a particular section.

No Downloads

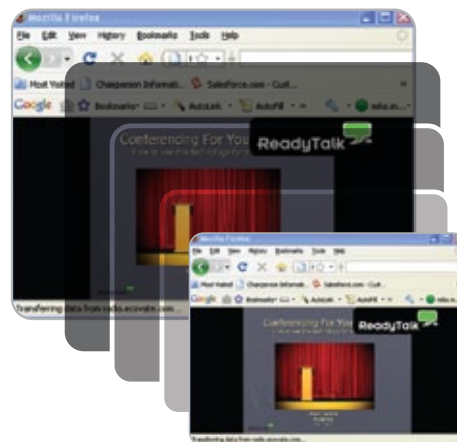

Your audience will never wait for another download again. The Media Player launches directly in your browser - no plug-ins or downloads required.

Playback In Any Browser

Firefox, Internet Explorer, Mozilla or Safari - it does not matter. You can watch the recordings in the browser of your choice.

→ Easily share your conference on your sites.

→ Scalable to fit the size of your window.

→ New thumbnail views for easy browsing.
