

# International Conferencing

*ReadyTalk makes it easier and more convenient to connect people around the world. With ReadyTalk's fully integrated web conferencing service and international conferencing capabilities, your employees, customers, and partners are able to share ideas and conduct business around the globe.*

## International Toll-Free Conferencing

- ReadyTalk provides toll-free numbers covering 50+ countries across 5 continents.
- International participants can join a conference easily by dialing the specific country's toll-free number and entering your personal access code.
- International participants can join your conference in the same reliable and user-friendly way as domestic participants.

## International Dial-Out

- A conference host can easily dial-out to international participants and there is no need for the host to distribute numbers in advance.
- International participants don't incur long distance charges.
- Using the ReadyTalk Web Moderator, you can also dial-out and join up to 20 participants into a conference at once with the click of a button.

## U.S. Toll Conference Number

- ReadyTalk also provides a U.S. toll number that your participants can use to connect into your conference.
- Using the U.S. toll number, your participants are able to enter your conference from any country.
- Participants are responsible for their own long distance charges and simply dial a standard U.S. toll number.

ReadyTalk is the ideal choice for businesses operating on a global scale. Our international audio capabilities combined with our simple web conferencing allow you to easily run a high-impact business meeting.
