

# ReadyTalk International Audio Conferencing

AUDIO CONFERENCING

Global communication is a critical part of business today. Organizations must communicate effectively with international customers, partners and colleagues in today's global economy. With fully integrated international audio and web conferencing, ReadyTalk makes it easy and convenient to share ideas and conduct business around the globe.

## International Audio Conferencing Services

With a variety of international audio conferencing options, ReadyTalk helps companies communicate the way that is most effective. No matter the option, all of ReadyTalk's international audio conferencing services include the ability to:

- Hold on-demand or scheduled calls
- Record calls for future playback or distribution
- Dial-out to participants
- Mute and unmute lines
- Control the call with the phone keypad or web-based controls
- Lock the call and utilize other security features

### International Toll-Free

By using a country-specific toll-free number, international participants can join a conference in the same reliable and user-friendly way as domestic participants. ReadyTalk provides toll-free numbers for more than 75 countries.

### International Toll Number

Toll numbers allows participants from any country to join a conference call. Participants are responsible for any long distance and international charges that may apply. Local toll numbers are available for more than 15 countries. The hosting company is responsible for the U.S. bridge rate.

### International Dial-Out

Conference moderators can easily dial-out directly to international participants. Participants don't incur long distance charges and it eliminates the need for conference organizers to distribute international numbers in advance.

Additionally, using the web-based conference controls, the chairperson can dial-out to as many as 20 participants, joining them to the call with a few clicks of the mouse.

## ReadyTalk Broadcast Audio

Deliver high-quality audio directly to attendees' computer speakers with ReadyTalk Broadcast Audio. Adding Broadcast Audio to an operator-assisted call gives participants the option for convenient listening over the Internet or choosing to dial in with a telephone.

Broadcast Audio makes it easy to reach an international audience and expand the size of your event without exceeding your budget.

## Why ReadyTalk Audio Conferencing?

### Quality and Reliability

Crystal-clear voice quality over a fully redundant worldwide voice network with more than 60K ports and 8 data centers.

### Worldwide Availability

Global toll and toll-free access in more than 75 countries and direct dial-out to virtually anywhere in the world.

### Superior Service

Expert staff available 24X7 to answer your questions and to ensure your conferences are trouble-free.
