

ReadyTalk Media Player

RECORDING & ARCHIVING

Want to increase your market reach, build your online presence or establish ongoing communication with your employees and customers? Give your audience the sophisticated playback experience they demand and get more from recorded marketing webinars, training sessions or sales demos with the ReadyTalk Media Player.

Embed Recorded Content in Any Site

Leverage your content and continue the conversation with your audience when you embed your conference recordings directly into blogs, social media sites or your company website. With a single click, viewers see your content without leaving your site. Sharing your recorded content has never been easier!

Deliver a Sophisticated Playback Experience

Whether you embed your ReadyTalk recording or simply share the playback link, the ReadyTalk Media Player makes it easy for your audience to view a high-quality replay of your recording.

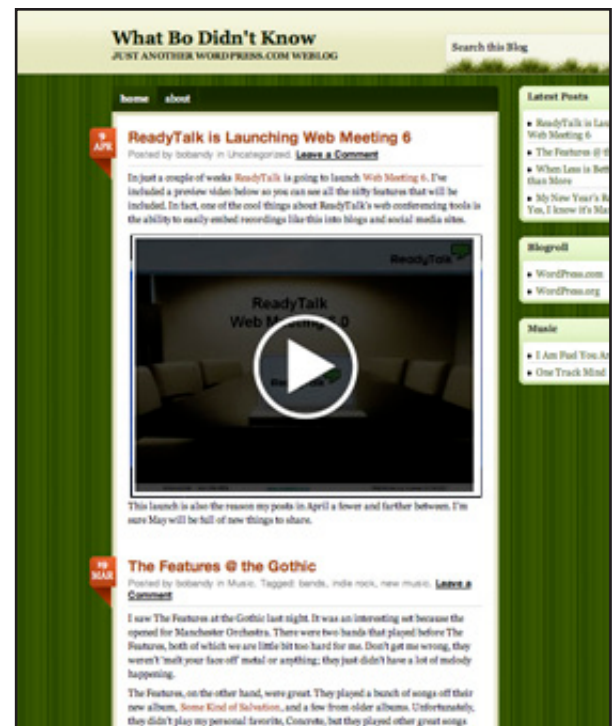

Scalable: The Media Player scales to fit the viewer's window – no more annoying scroll bars or missed information.

Viewing Controls: Viewers can access embedded controls to fast forward, rewind, play, stop and pause your recording.

Preview By Thumbnail: Viewers can jump to the part that interests them by browsing thumbnails on the fly. No more blind fast forwarding and rewinding to find a particular section.

No Downloads: The Media Player launches directly in your viewer's browser – no plug-ins or downloads required. Viewing recordings with ReadyTalk's embeddable media player requires Flash 6 or higher (use Flash 9.0.28 or higher for optimal viewing experience).

Playback In Any Browser: Firefox, Internet Explorer or Safari – it does not matter. Viewers can watch your recording in the browser of their choice.

ReadyTalk makes it easy to embed a recording for playback in any website, blog or social media site. The ReadyTalk Media Player delivers the YouTube-like playback experience today's savvy viewers demand.
