

ReadyTalk

System Requirements

ReadyTalk believes web conferencing should be simple and easy to use, so we offer industry-leading platform and browser support. For optimal performance, we recommend the following system configurations:

OPERATING SYSTEMS	SUPPORTED BROWSERS	SOFTWARE	MOBILE
Microsoft Windows XP (service pack 3), Vista, 7 & 8+ (32 and 64 bit)	Internet Explorer (7.0+) Firefox (31.0+) Chrome	Flash 11+ OR Java 1.7+	To join a meeting from an Apple iPad, iOS 7+ and the ReadyTalk Mobile app are required. Recordings can be played from Apple and Android devices.
Linux 2.6+ kernel; 64 bit; x86 CPU required	Firefox (31.0+) Chrome		
Apple Mac OSX 10.7+ (Intel-based processors)	Firefox (31.0+) Safari (6.2+) Chrome	Flash 11+ OR Java 1.7+	

MORE ABOUT READYTALK'S REQUIREMENTS

It is quick and easy for presenters and participants to get into web conferences. Chairpersons and co-presenters must do a one-time application download prior to hosting a conference.

Most participants will be able to quickly attend conferences using ReadyTalk's Flash-based participant application, which requires no download. For the best conferencing experience, we recommend participants use Flash 11 or higher. Participants who do not have a compatible version of Flash and cannot install it can join the conference with ReadyTalk's alternative java-based participant application.

NEED HELP?

ReadyTalk's customer care team is available 24/7 to support you and your meeting participants. You can reach us at 800.843.9166 or visit readytalk.com/contact.

ADDITIONAL REQUIREMENTS:

- ReadyTalk limits accounts to 200 slides to ensure that your account is easy to manage and that your slides load more quickly.
- Listening to Broadcast Audio requires computer speakers or a headset.
- VoIP Audio requires speakers and microphone, a USB headset is recommended.
- Video conferencing requires a web camera; an external web cam is recommended for the best experience.
- Flash 10.1 is required to view recordings.
