

# ReadyTalk Scheduler for Outlook

## Windows Unattended/Silent Installation Instructions

For customers wanting to install our ReadyTalk Scheduler for Outlook to their employees in a silent and unattended capacity, ReadyTalk offers the following install method.

- The following applications are prerequisites for the ReadyTalk Scheduler for Outlook. The installer checks for the prerequisites and if not found, installs them. If preferred, the installation of these can be done in advance:
  - Microsoft .NET version 4.0 Extended
  - Microsoft .NET version 4.0 Client Profile
  - Microsoft Visual C++ Runtime 2010
    - i. Note: If running Outlook 64-bit, make sure to install Microsoft Visual C++ Runtime 2010 64-bit
  - Microsoft Visual Studio Tools for Office (VSTO) Runtime 2010
    - i. Note: If running Outlook 64-bit, make sure to install VSTO Runtime 2010 64-bit
  - Outlook 2007, 2010, or 2013 (32-bit or 64-bit)
  - Windows XP (SP3), Windows Server 2003 (SP1), Vista, 7 or later
- Installation through Command script: To install the ReadyTalk Scheduler for Outlook on a Windows machine in a silent and unattended mode, please use the following syntax.
  - "readytalk\_outlook\_scheduler\_installer.exe" /exenoui /qn
- Set default meetings to Scheduled Meeting type (NOTE: Users can still switch default meeting type after install under Settings.) Installation through Command script:
  - "ReadyTalk\_Outlook\_Scheduler\_Installer.exe" /exenoui /qn  
MEETING\_TYPE\_SCHEDULED=true

### **Important Notes:**

- Users will not see the ReadyTalk Scheduler until their Outlook is restarted.
- Prerequisites are NOT bundled in the installer, if the Microsoft download pages are blocked by company network, the prerequisite installs will fail silently and the Outlook Plugin will continue to install
  - This may result in the ReadyTalk Outlook Plugin not loading properly
  - To fix the problem, install the prerequisites listed above
